DETAILED ACTION

Response to Remarks

1. Applicants' arguments, filed on 1/3/2005, have been approved and entered. They have been fully considered. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either newly applied or reiterated. They constitute the complete set presently being applied to the instant application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 13-16, 37 are rejected under 35 U.S.C. 102(a) as being anticipated by Parchi et al. American Neurological Association 1996, 39, pp. 767-778.

Parchi et al. discloses distribution of protease-resistant prion protein with Western blot and immunohistochemistry in cases of sporadic Creutzfeldt-Jacob disease. They identified four groups of subjects defined by the genotype at codon 129 of the prion protein gene, the size of common methionine/valine polymorphism and two types of proteases-resistant proteins that differed in size and glycosylation, (see abstract, page 3 and figure 1). Page 4 describes that two types of PrP type 1 and 2

were detected and differed in electrophoretic mobility and ratio of the differently glycosylated PrP isoforms.

4. Applicants argue that the reference relates only to CJD and does not show the specific banding pattern resulting from bovine spongiform encephalopathy. This is not convincing because instant claim 13 states a method of identifying infection in an animal **and/or tissue of bovine spongiform encephalopathy**. The word "or" mean that it is not required. Additionally said claim is stating that said prion protein can be characterized by having three distinct bands. The term "can be" means having the capability which is not the same as actually performing the function. Therefore the reference still read on the rejected claims and is maintained.

5. Claims 1-10, 35-36, 38 are allowed.

6. Claim 26 and 39 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. **THIS ACTION IS MADE FINAL.** See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for response to this final action is set to expire **THREE MONTHS** from the date of this action. In the event a first response is filed

Art Unit: 1637

within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for response expire later than SIX MONTHS from the date of this final action.
